

Optional devices for GPS System

(Prices without VAT)

Optional Devices	Price	Description
Fuel consumption reading device using the FMS interface	90 €	This device allows reading the onboard computer (CAN) for vehicles, trucks using the FMS interface/connector. Parameters like fuel consumption, fuel level, odometer, rpm etc. can be read. The connection to the FMS interface is made using special cables that read the data by induction, not needing to cut any wire.
Ultrasonic universal fuel level meter	285 €	The ultrasonic fuel level meter sticks on the bottom of the tank, without giving holes into the tank, and has a precise reading of the fuel level using ultrasonic sounds (the technology is similar to the one of sonar's used in marine environment, like submarines). The devices read only the fuel level in the tank. It auto calibrates itself by my making at least to complete feedings.
Driver identification device Token Type	10 €	The kit consists of one buzzer, one key tag, one key reader and one token.
Individual key/Token	5 €	Additional tokens can be acquired.
Driver identification device RFID Type	29 €	-
RFID identification card	2 €	Additional card can be acquired.
Button for blocking the position while making routes in personal interest.	29 €	A button can be installed and by pressing it the position is blocked, if the driver wants to make a personal interest or private route. The distance and the fuel consumption is calculated only the real position of the car is blocked when the button is pressed.
Temperature sensor	29 €	For refrigerating vehicles or any other vehicle needing to monitor the temperature in the rear deposit/transport compartment a temperature sensor can be installed to monitor the temperature.
Sensors for recognizing events such as "door open/closed", "crane arm movement", "bulldozer cup lift" etc.	5 €	Magnetic sensors with high mechanical and thermal resistance
Switch off button of GPS monitoring	5 €	By pressing the button the GPS power supply is intentionally stopped. The GPS equipment will no longer supply any information.
Cable surge protection	15 €	Recommended for heavy-duty machines and/or old vehicle that have electric problems and can generate a surge of over 35 V.
Power supply cable	15 €	-
